

This listing of claims will replace all prior versions, and listings of claims in th application:

Listing of Claims:

Claims 1-3 (cancelled).

Claim 4 (Currently amended) A ratchet driver as set forth in claim 2 wherein comprising a ratchet control assembly, a driver assembly rotatable relative to said ratchet control assembly, a ratchet sleeve operatively connected to said driver assembly, and surrounding said ratchet control assembly, said ratchet sleeve having a plurality of inwardly facing control openings, including first and second control openings, said ratchet control assembly having first and second slots, said first and second slots being substantially parallel to each other, said first and second slots having first and second stop slides, respectively mounted therein, means for moving said stop slides within said control openings, stop slide control means, means for moving said stop slide control means to a position to move said first stop slide out of a first one of said control and allow the second stop slide to be in a second one of said control openings, said moving means adapted to move stop slide control means to a position to move said second stop slide out of said second one of said control openings and allow the first stop slide to be in said first one of said controls openings and said moving means adapted to move said stop slide control means to a position to allow said first and second stop slides to be in said first and second control openings, said stop slide control means comprises a control cam, said control cam comprises a curved control cam having tapered ends.

Claim 5. (Cancelled).

Claim 6. (Previously presented) A ratchet driver as set forth in claim 4 wherein said control cam is moved to one position where one of the ends is in front of said first stop slide and its other end is away from said second stop slide to a second position where both ends are away from said first and second stop slide to a third position where said second cam end is in front of the second stop slide and away from the front of the first stop slide.

Claim 7. (Original) A ratchet driver as set forth in claim 6, wherein said second position comprises a position between said first and third positions.

Claim 8. (Original) A ratchet driver as set forth in claim 7, wherein said control assembly comprises an upwardly extending head portion and wherein said slots are in said head portion.

Claim 9. (Original) A ratchet driver as set forth in claim 8, wherein said slots are substantially parallel to each other.

Claim 10. (Original) A ratchet driver as set forth in claim 9, wherein said ratchet sleeve is mounted around the said head and said driver assembly.

Claim 11. (Previously Presented) A ratchet driver as set forth in claim 10, wherein said head has a ledge extending therefrom and wherein said ratchet sleeve rests on said ledge.

Claim 12. (Original) A ratchet driver as set forth in claim 11, wherein a pin extends from said control cam, said pin being adapted to control the movement of the control cam.

Claim 13. (Original) A ratchet driver as set forth in claim 12, wherein an outer cover overlies the driver assembly and the ratchet and wherein said pin extends through said outer cover.

Claim 14. (Original) A ratchet driver as set forth in claim 13, wherein said driver assembly has a neck and sleeve adapter for driver bits to be attached thereto.

Claim 15. (Previously presented) A ratchet driver as set forth in claim 14, wherein said means for moving said stop slides are spring means mounted in said slots in order to move said stop slides out of said slots.

AMENDMENTS TO THE DRAWINGS

The attached two new replacement sheets of drawings including Figs. 1-8 replaces all of the original sheets of drawings. These replacement sheets include changes to Figs. 1, 2, 4, 5, 6 and 8. These changes are identical to the proposed changes in the drawing that have been approved by the Examiner.

Attachment: 2 replacement sheets
